- Performance Disclosures: AMI Asset Management (AMI) is an independent investment management firm registered with the Securities and Exchange Commission since 1994. Registration does not imply a certain level of skill or training. AMI provides discretionary asset management services to institutional and individual clients through separately managed accounts using seven equity and fixed income strategies. The Domestic Large Cap Growth Composite includes all fully discretionary, fee-paying and non-fee-paying, taxable and nontaxable households with at least \$400,000 in equities on the last day of the previous quarter. Beginning January 1, 2006, the composite was constructed using client households, as defined, whereas previously the composite was constructed at the account level. The composite was modified beginning January 1, 2006, to reflect the increase in our minimum equity balance per household from \$100,000 to \$400,000. Returns are presented gross and net of management fees and include the reinvestment of all income. Gross returns are presented before management fees but after all trading expenses. Net returns are calculated by deducting 1/4th of the highest applicable annual fee of 1.0% from the gross composite returns on a quarterly basis. The annual fee schedule is as follows: 1.00% on the first \$10 million and 0.75% on the balance. Actual fees charged to clients may vary. The minimum annual management fee is \$10,000 (based on a client's total assets under management), which may be waived by AMI. Further information regarding investment advisory fees is described in Part 2A of the firm's Form ADV. Clients should not assume that managed accounts will attain similar investment performance in the future. All accounts are individually managed; therefore, returns for separate accounts may be higher or lower than the average performance stated above. Individual results may vary in the AMI Large Cap Growth Equity Strategy based upon the (1) individual account asset management fee, and (2) when the client enters and exits investment in the AMI Large Cap Growth Equity Strategy. The benchmarks we use are the Standard & Poor's 500<sup>®</sup> Total Return and the Russell 1000<sup>®</sup> Growth Index. Indices are unmanaged, and one cannot invest directly in an index. The Standard & Poor's 500<sup>®</sup> Total Return is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. It includes a representative sample of 500 leading companies in leading industries of the U.S. economy. The S&P 500<sup>®</sup> Total Return focuses on the large cap segment of the market with over 80% coverage of U.S. equities. The Russell 1000<sup>®</sup> Growth Index measures the large-capitalization growth sector of the U.S. equity market. It is a subset of the Russell 1000<sup>®</sup> Index. The Index is capitalization-weighted and consists of those companies, or portion of a company, with higher price-to-book ratios and higher forecasted growth within the Russell 1000<sup>®</sup> Index.
